Thank you, Joe.

The work plan request is under development, but there have been a number of fire drills here.

Hope to send you the letter on Monday.

Kindly, Brad has been answering our calls on his days off and we have, in effect, been sorting out the work plan in real time.

Carolyn

Carolyn- I attempted to call you on the number you had given Brad but there was no answer. Ex. 6 Personal Privacy (PP) did contact the Amohenol legal department at our corporate offices so we will let them talk through his concerns.

As far as actual work to address issues, we have not seen the letters requesting the actions we have discussed. We may be in a position to move forward quickly with on site ambient air testing but this will need approval (per your direction) from the agency. Hopefully we can get your letter and submit a work plan early next week for sampling possibly as early as late next week.

Please feel free to contact me concerning this work either on my cell (607) 435-6732 or by email. As I am driving at this time email may be the easiest and safest method.

We will continue to work towards a possible on site sampling event next week with the thought that both the agency and Amphenol will be in agreement with the work plan we are developing.

Thank you
